

Preparation of antibiotics stocks

Materials

1. Ampicillin (5gr)
2. Distilled water- sterile!
3. Syringe+ 0.22 filter

Protocol

1. Add 1g of Ampicillin to 10ml distilled sterile water
2. Vortex
3. Add the liquid to the syringe and put the filter on top
4. Put the Ampicillin in Eppendorf- so in each one there will be 0.5ml (about 20 Eppendorf)
